

Result for IERI Research Proposals 2018

We'd like to say thank you for your application to IERI call for proposal 2018 and for your patience regarding of delayed process so much.

This was an extremely competitive process, and we received hundreds of applications. This was definitely a tough decision for us!

We've reviewed many research proposals and their experiences and have decided to proceed with these researches below:

No.	Research Topic
1	Climate Variability in Relation to Floodplain Erosion and Water Quality Characteristics of the Ikpa River Basin
2	Effect of heat stress on human health and livelihood in slums and poor neighborhoods of Faisalabad
3	Assessing relationship between water quality index and pollution load during extreme precipitation events of the Chao Phraya river
4	Selection and Isolation of Salt-tolerant Rhizosphere Microbiome from Seawater-Intruding Rice Paddy Field in Vietnam
5	Biomass Resources from Rice Straw: from paddy field to alternative energy and environmental treatment source
6	Bioaccumulation of trace metals in the hard clam, <i>Meretrix lyrata</i> , downstream of a developing megacity, the Saigon-Dong Nai River estuary
7	Application of New Generation of Wetland Roof System for Treating Domestic Wastewater Coupling with Enhancing Green Urban Area to Reduce the Climate Change Effect in the Urban Tropics

Congratulation on your research fund 2018. Each fund recipient must get an email from GIST/IERI on Sep 27th. 2018 regarding of the further procedures. If not, just inquire to Mrs. Ji Sun Jung, the IERI admin staff (jjs1217@gist.ac.kr).
